Abstract (en)
[origin: US2003131545A1] A residence space forming equipment is provided including a plurality of partition panels to be interconnected for forming a residence space, wherein: some of the partition panels define a gateway therebetween for entry into and exit from the residence space; and the partition panels defining the gateway are interconnected through a guide member having at least one portion protruding horizontally from the partition panels to indicate the presence of the gateway. This construction makes it possible to enhance the efficiency of an organization of a knowledge-intensive type markedly.
