Abstract (en)  
[origin: US2004211045A1] The invention relates to a holding device for a tarpaulin-like or cloth-like object to be processed. To provide a holding device that means are provided for releasably pressing at least a part of the object to be processed against a processing head connectable with the holding device, said means being releasable from the contact position via an actuating lever, it is suggested within the scope of the invention that means are provided for releasably pressing at least a part of the object to be processed against a processing head connectable with the holding device, said means being releasable from the contact position via an actuating lever.
