Abstract (en)

[origin: WO03025384A1] The invention concerns a fixing device for fixing an injector (1) on a cylinder head (6). Said injector (1) comprises several axially successive modules (7, 2, 3) pressed against one another by means of a prestressing element (4). A fixing force (F) for fixing the injector is applied on the prestressing element (4) to counter the influence of opposite forces applied on the injector modules.
