Abstract (en)

[origin: EP1428452A1] The device has a container (1) having a dose of a cosmetic product e.g. shampoo or gel shower and another container comprising a space for storing the cosmetic product. A distributor body communicates with the storage space to receive a dose of the cosmetic product. An indicator (2) with a thermo chromic pigment changes state e.g. color in a reversible way based on temperature of the product in the latter container. An Independent claim is also included for a procedure for application of a cosmetic product.
