Abstract (en)
[origin: EP1428950A2] Supporting framework for at least one plate (3) provided in a construction comprises supporting beams (4a, 4b) joined together at their facing ends (6a, 6b) to form a supporting beam pair. The supporting beam pair is supported at the ends (5) of the beams facing away from each other on foundations (7) or other supports and bridge the distance between the foundations or supports. Preferred Features: The supporting beam pair runs in the longitudinal direction of a row of a number of plates forming a surface (2).
