Abstract (en)

The method involves connecting the respective motor vehicle fitting or installation part (1b) to a contact point (18) of a conductor of the motor vehicle electrics or electronics by introducing an electrically conducting adhesive (19) between them. The motor vehicle fitting or installation part is a component of a motor vehicle door handle, which is connected to the conductor by means of a plate (15) formed on it and the adhesive. AN Independent claim is also included for the following: (a) a motor vehicle fitting or installation part with at least one electrically conducting surface.

Abstract (de)

Gegenstand der vorliegenden Erfindung ist ein Verfahren zur elektrischen Kontaktierung von oberflächlich elektrisch leitfähigen An-/Einbauteilen bei Kraftfahrzeugen im Zuge ihrer Montage. Dabei wird das jeweilige An-/Einbauteil unter Zwischenschaltung eines elektrisch leitfähigen Klebers mit einer Kontaktstelle eines Leiters der Kraftfahrzeug-Elektrik/Elektronik verbunden. <IMAGE>
