Abstract (en)
[origin: EP1429214A1] The clock has a locking lever (44) connecting hourly setting lever (47) to a moving part (37) of a ringing mechanism. The locking lever blocks the hourly setting lever as soon as the moving part is isolated from its home position. The hourly setting lever includes a stem of winder (40) over which a pull knob (39) is placed, and a pinion (41) is assembled sliding to come in contact with a wheel of the hourly setting lever.
