Abstract (en)

[origin: EP1429350A2] The method involves setting the relative position (21) between an armature plate (2) and armature bolts (7) to a first defined measurement (24) or a second defined measurement (27) in a pressing process, after assembly of the magnetic armature (1) from armature plate (2) and armature bolts. During the pressing process, a distance measuring system monitors the first defined measurement, or a spacer is used.
