Abstract (en)

[origin: DE10258101B3] The antenna device has an antenna structure incorporated in a flat component of the automobile, e.g. a windscreen, its foot point having a contact position for electrical connection with an antenna amplifier, with a non-conductive carrier plate (1) between the flat component and the antenna amplifier, the electrical connection between the contact position and the antenna amplifier provided by a contact spring (2) received by recesses (3,4) in the carrier plate.
