Abstract (en)
[origin: WO03026457A1] The invention concerns a device for smoothing out hair, in particular to straighten and shape them, provided with means to be connected to the electric power system and comprising essentially a handle (2) and a head (3), said head including at least three combs (6, 7, 8) and heating means for smoothing (4). The invention is characterized in that said comb(s) form a gripping element adapted to exert a continuous tension of the hair under the effect of control means (10).
