Abstract (en)

[origin: WO03026814A1] The invention relates to a method for producing a shaft (22) and to a device containing one such shaft (22), especially a rotor shaft (22) of an electromotive drive (12). Said rotor shaft (22) comprises a recess (38, 38'), at least in one location, in which a projection (40, 40') of the sleeve (36) positively engages, axially fixing said sleeve (36) in a rotatably fixed manner.
