Abstract (en)

[origin: DE10149389C1] The upper part has a holder for a screen printing pattern (2) supported in side guides (1), for movement to and from the printing table in dependence on the movement of the rake carrier and provided with bearing angles (4,4a) for the screen printing pattern, attached to cross beams (7,8) via pivot hinges (5,6). The cross beams are mounted on carriages (9) at either end, displaced along carrier rails (10,11) relative to the side guides.
