Abstract (en)
[origin: WO03029540A1] The invention relates to a method for producing woven airbags, especially at least partially multi-layered airbags. Said method comprises the following steps: a) the warp threads are prepared in the warping room, warp threads which are suitable as marker threads for machine-readable markings being already placed in the warp; b) the airbag material is woven, weft threads which are suitable as marker threads for machine-readable markings being interlaced over at least part of the width of the cloth; and c) the airbag is cut out of the airbag material using a cutting device which is guided by the interlaced machine-readable markings.
