Abstract (en)

[origin: WO03027404A1] The invention relates to a sanitary equipment (1), especially a wash basin, sink or the like which on its top has a surface of impact (2) on which a liquid (13) impacts, said surface (2) being disposed at least at the same height or higher than the top rim (21) of the sanitary equipment (1). Around the surface of impact (2) an annular gap-type recess (4) is configured in the top surface (21) of the sanitary equipment (1) which the liquid (13) impacting the surface of impact (2) enters once the liquid flows over the rim of the surface of impact (2) and via which said liquid (13) can be discharged from the sanitary equipment (1).
