Abstract (en)
[origin: WO03023299A1] The invention relates to a housing for a refrigeration device, which is composed of an outer housing box (1) that encloses an interior space, and at least one intermediate bottom (4) mounted in the interior space. Said intermediate bottom (4) comprises a pre-shaped core (12) made of a solid foam material, which is directly fastened on the inner wall of the housing box (1).
