Abstract (en)

[origin: WO03027834A2] The invention relates to a data processing system with at least one data processing unit, in which a number of data banks for the data processing system with user-specific data are linked to each other to form a single resultant user data bank. Access authorisation to resources provided by the at least one data processing unit are given by pre-defined user roles. At least one user role is given to at least one user of the data processing system.
