Abstract (en)
[origin: WO0237499A1] The invention relates to a device for playing back MP3 files that can be coupled to a playback device (1) or a radio device. The invention provides an accessory that can be coupled to a car radio instead of, or in addition to a CD player. The device consists of storage means (2) and reading means for MP3 files, said means being connected to the audio input of a playback device (1) via an MP3 processor (4). The device is characterised in that the control inputs and outputs (8) of the storage means (2) and playback device (1) are coupled to a microprocessor or a microcontroller (3).
