Abstract (en)
[origin: WO03030321A1] The invention relates to a switchgear cabinet comprising two lateral lower profiled rails that provide a bearing surface and a base plate that can be laid and fixed thereon. The bearing surface (7) of the profiled rails (1) is provided with a series of holes and the base plate (2) can be fixed by means of at least one connecting element (3) that can be introduced into a hole (8) of the series of holes, damaging the internal wall of said hole (8), thereby producing a positive fit.
