Abstract (en)

[origin: EP1431033A2] The arrangement produces a cylindrical print forme from a flat cut-out with rounding (2) and welding (3) stations. A device for picking up and transporting the raw plate has a fixing frame (6) with two adjustable lifting elements. The plate edge forming the start has a register device. A lifting element (13) has a register device (15) that interacts with the first register device and at least one contact element for fixing correctly according to the register.
