Abstract (en)

[origin: EP1431198A1] The folding box for the presentation and/or packing of an object has a rear flap (6) glued on the inside to the back wall (2), and the side walls (3,4) lie against a vertically standing collar (9) so that they fix the object. Above the collar, fold sections (11,10) are connected via a round scoring (111,110) to the side walls (4a,3a) so that the fold sections fitted or glued one upon the other. Insertion tabs (14,15) are connected to the bottom flap and are each connected on the inside to the side wall. Independent claims are also included for the following: (a) a blank for the manufacture of a folding box; and (b) a use for the folding box which is for the presentation or packing of an object.
