Abstract (en)

[origin: EP1431445A1] The carrying element (100) features two outer holding sections (102,104), which are oblong and situated at a distance from each other in the same direction. A central oblong holding section (106) forms a space with each of the outer sections. The holding sections are joined together at one end via a transverse bar (108). The spaces form oblong slits (126,128), which are open at the ends located opposite the transverse bar.
