Abstract (en)

[origin: EP1431466A2] Device arrangement for an interior installation comprises installations for e.g. a cold water supply for the house and garden, and a heating and drinking water heater that require fittings and accessory equipment. The fittings and accessory equipment for several of the installations are combined to form an assembly for mounting as a set. Preferred Features: The fittings and accessory equipment are mounted in a frame structure (10) for attaching to a wall. The assembly is covered by a hood. The fittings and accessory equipment are controlled by a common electronic control unit (166).
