Abstract (en)
The cable connector shell for a multiple wire cable comprises a housing (12) having an opening (36) for passing therethrough at least one multiple wire cable (32), an electronic circuitry (26) within said housing (12), a first connector (42) arranged within said housing (12) said first connector (42) comprising at least one first connector element (40) to be electrically connected to the individual wires (34) of the multiple wire cable (32), and an engageable and disengageable mating second connector element (44) electrically connected to said electronic circuitry (26), and a third connector element (46) electrically connected to said electronic circuitry (26) said third connector element (46) engageable with a mating connector element (50) of an electrical device (52) for electrically connecting thereto the multiple wire cable (32). <IMAGE>
