Abstract (en)

[origin: EP1432081A1] In a linking mechanism there is a kinematic chain with a lever mechanism (7), a connector support (16), a clasp (12) and a mechanical locking device (MLD) linked to an electrical/electronic contact device (EECD). A first subsystem fits on a support system. A second subsystem fits on a motor vehicle. The MLD and EECD interlink via the lever mechanism.
