Abstract (en)

[origin: DE10147669A1] The piezoactuator has a piezoelement (2) for operating a mechanical part (5), where the piezoelement is biased by a spring element (4) in the form of a pot. The piezoelement is arranged in a pot-shaped housing. The pot-shaped spring element has at least one opening in the form of a slot passing from a floor area to a wall area.
