Abstract (en)

[origin: WO03028378A1] In order to convert an MPEG-2-compatible transport flow, said flow is decomposed into video and/or audio parts and program-accompanying information messages. The program-accompanying information messages are converted into a DVD-compatible format and are integrated into a DVD-compatible program flow together with the video and/or audio parts. Said measure enables an enlarged display possibility to be provided in simple terminals which only have one base functionality.
