Abstract (en)
[origin: EP1433716A1] The closing element (1) is for a bag with a closable outflow part (5), a welded-in part (2) on the outflow part, and an outflow channel passing through these two parts. The outlet channel (4a) in the welded-in part is at least partly funnel shaped towards the outflow part. The funnel surface may be at an angle (approximately) of 20-85degrees to the longitudinal axis of the closing element.
