Abstract (en)

[origin: EP1433919A2] Return-action mosquito net, with adjustable locking devices (10,11) on the bar (3) and holding devices (29,30) at the end of the guide (8,9), whose position on the guide (8,9) is optional. The mosquito net, be it vertically or horizontally sliding, functions with three members only: the box housing the wound net, and the two guides (8,9). Thus, a vertical side guide is not needed for a horizontally sliding mosquito net to function. <??>The present invention is industrially applied to return-action mosquito net frame and device manufacture and industry. <IMAGE>
