Abstract (en)

[origin: WO03030654A1] The present invention relates to a method for preparing animal plasma powder by starting from treated animal blood and converting said blood into blood plasma and drying it, in which the treatment of the blood takes place by immunising the animal with pathogens for the animal in question and/or components thereof. The invention furthermore relates to an animal feed in which the usual components of the feed are mixed with an active component. The invention also relates to the animal feed thus obtained.
