Abstract (en)

[origin: WO03031556A1] The invention concerns washing, rinsing or cleaning products in portions, which comprise a preparation with washing, rinsing or cleaning action, enclosed in an envelope. The inventive products have advantageous properties when the unfilled envelope can be deformed by a force  $F_1 > 0 \text{ N} \leq 500 \text{ N}$  along a path  $s_1$  and recovers its initial shape when the force is no longer applied or has an adjusting speed  $v > 0 \text{ mm/min}$  and  $\leq 1000 \text{ mm/min}$  when the deforming force is no longer applied.
