Abstract (en)
[origin: WO03031805A1] The invention relates to an injector consisting of two interconnected main sections, a body section (1) and an injector section (2). The injector section (2) is connected to the body section (1) by means of a positive fit (3, 4, 5), said connection (3, 4, 5) being produced by means of a partial material connection (4). The injector can be preferably used in a fuel-injection device for an internal combustion engine.
