Abstract (en)

[origin: EP1298433A1] The invention relates to a novel device for efficiently generating a large number of different substance mixtures of at least two substances and assaying the interaction, especially the joint interaction, of at least two substances with at least one target, as well as to a method for assaying the afore-mentioned interaction and the use of the method and the device for assaying substance(s)-target(s) interaction(s).
