Abstract (en)

Turbulence system (17) in a control system (02) for controlling the temperature of a component (01) of a machine comprises in direct succession a cross-section enlargement, a direction change, and a cross-section reduction. An Independent claim is also included for a device for controlling the temperature of a component of a printing machine using a fluid whose temperature is changed at a feed point (16). Preferred Features: The turbulence system is arranged in a control system for controlling the temperature of a component of a printing machine. The turbulence system is arranged between a feed point and the component.

Abstract (de)

Eine Verwirbelungsstrecke in einer Regelstrecke zur Temperierung eines Bauteiles einer Maschine weist in direkter Abfolge eine Querschnittsvergrößerung, eine Richtungsänderung sowie eine Querschnittsverkleinerung auf.
