Abstract (en)
The cross work has two cross work modules (10, 20) that are linked by a longitudinal cut of a groove (34) forming a hinge (30) between them. The modules are made of rigid panels (101) of undulate cartons. The module (10) is brought down on the module (20) based on a shaft (R) and the modules are in intermediary folding position in chisel. The modules are folded on their edges based on a distorted parallelogram mechanism. An Independent claim is also included for a container having a majority of cross-works.

Abstract (fr)
L'objet de la présente invention est un ensemble de croisillons pour conteneur. Selon l'invention, il comporte au moins deux modules de croisillons (10, 20) reliés entre eux par au moins un moyen formant charnière (30). <IMAGE>
