Abstract (en)
[origin: EP1435328A1] The invention relates to a pallet (1) having a load-bearing platform (4,5), composed of an integer number of part pallets (7,8) being arranged adjacent to each other side by side, each part pallet (7,8) having a load-bearing platform with spacers (9,10) carrying the load-bearing platform (4,5). A solution for connecting the part pallets which is particularly simple, cheap to produce and which allows easy separation of the parts from each other is made available in that means (6) are provided connecting adjacent spacers (10,10') of adjacent part pallets (7,8) on their lateral side surface exterior to the pallet (1), wherein said means (6) are detachably connected to the adjacent spacers (10,10'). <IMAGE>
