Abstract (en)
[origin: US2003224697A1] A continuous loop toy vehicle trackset supports a booster and a plurality of toy vehicles. The trackset is formed of spaced apart track rails forming a gap therebetween. The toy vehicles are open wheeled and able to roll upon the track rails in either a right side up or inverted configuration. In the inverted configuration, the top surface of the toy vehicle is able to extend into the gap between the track rails. A staging lane facilitates introduction of additional toy vehicles to the trackset.
