Abstract (en)
[origin: WO03033822A1] The invention relates to a device for preparing ski slopes. Said device breaks up the snow by means of a crushing device when displaced in relation to the layer of the snow cover to be prepared. The inventive device comprises a preparation chamber (8), inside which the snow broken up by the crushing device (12) is whirled up, and a plurality of nozzles (17) which open up into the preparation chamber (8) and are used to add the preparation agent to the crushed snow.
