Abstract (en)
[origin: EP1437469A1] The window has a fixed frame (2) with vertical lining boards on either side with slits (8) accommodating guide pins (9) on the movable frame (4). Springs (13) in the hollow spaces (5) behind the vertical lining boards (6) pull on the pins to help move them along the slits. The slits are curved in an L-shape to give the window a lifting and tilting motion.
