Abstract (en)

[origin: EP1437802A2] The device has a socket (20) equipped with teeth (3, 34), which are situated within a radial plane and equally spaced apart circumferentially in the socket. The teeth cooperate with a part (40, 41) of a connector, where the part has an opening (47) to receive the teeth of the socket through a detent within a pre-selected position.
