Abstract (en)  
[origin: WO03035296A1] The invention concerns a contour roll former capable of operating with different sets of pairs forming heads (P1i, P2i) depending on the type of extruded profile to be produced. Said contour roll former is characterized in that said pairs of heads (P1i, P2i) are mounted on carriages (Ci) capable of sliding both ways along a direction (T) transverse to the forming line, so that it is possible to replace one set with another with minimum handling.
