Abstract (en)
[origin: WO03035348A1] The invention relates to an extruder comprising at least one screw which is situated in at least one axially extending bore hole (2, 3) in a cylinder, and a cutting plate (4) of a granulation installation. According to the invention, the cutting plate (4) is directly connected to the end of the cylinder, in the transport direction of the extruder, and the heating elements are arranged in the cylinder, in direct proximity to the contact surface between the cylinder and the cutting plate (4).
