Abstract (en)

[origin: EP1306198A1] Containers (17) are pressed to a bale (18) and wrapped or tied, for transport. <??>Baling takes place in a single stage. Optionally the bale is built up by successively, by adding and compressing further packages. Individual containers are pressed before baling, or during bale formation. A cubic or cylindrical bale is produced. Once pressed, a cord or band is wound around it, whilst in the compressed state. An Independent claim is also included for the baling press.
