Abstract (en)

[origin: WO03037668A1] The invention relates to an impact beam (7) for a vehicle body, which comprises an oblong box-type hollow profile (8). The aim of the invention is to provide an impact beam (7) that is lightweight and yet sufficiently rigid and solid in the event of an impact. According to the invention, an oblong, planar fiber-reinforced plastic element (10) is disposed at least on the back (9) of the hollow profile (8) facing the vehicle.
