Abstract (en)  
[origin: WO03038204A1] The invention relates to the waterproofing of buildings, which ensures the watertightness of joints or other moisture-sensitive building zones. Said waterproofing is achieved, whereby a strip-shaped intermediate layer is applied on, at or between floors, roofs and walls. Said intermediate layer is designed as a sealing profile (1) having at least one profiled surface with positive profile portions (11; 61) and negative profile portions (21; 71).
