Abstract (en)

[origin: EP1439507A2] A wagering gaming system comprises a gaming terminal and a sound processing system. The gaming terminal conducts a wagering game and the player is allowed to select sound preferences in connection with the wagering game. The sound processing system is adapted to process audio data in response to user selections of sound preferences other than a master volume preference. According to some embodiments, a user is able to make selections regarding sound aspects such as speaker settings, system sounds, sound field effects, and sound tones. <IMAGE>
