Abstract (en)
[origin: EP1439735A2] The housing (2) has sound amplification components inside the housing as well as at least one opening on the outside of the housing as well as a cover (4) covering the opening. The cover is formed in one piece with an outward-facing journals (5) and grooves (6) with boundaries provided in the housing so that the journals can be fed into the grooves from the inside of the housing and stop against the boundaries. AN Independent claim is also included for the following: (a) a hearing aid with an inventive housing.
