Abstract (en)
[origin: WO03037746A2] The invention relates to a packaging container for accommodating at least two stacks (3, 4) of moist cloths or moist cosmetic pads (2, 10, 12) in order to be able to remove the cloths or pads comfortably and to be able to prevent them from drying out over a long period of time. According to the invention, the moist cloths or moist cosmetic pads (10, 12) of different stacks (3, 4) overlap only in one partial area (6) in such a manner that a moist cloth or cosmetic pad (10) of one stack (3) protrudes into the partial area (6) while being situated between two moist cloths or cosmetic pads (12) of the other stack. In addition, the packaging container has an external shape that corresponds to the external shape of the moist cloths or moist cosmetic pads (2, 10, 12) located in overlapping areas while, however, deviating from the respective fundamental shape of the moist cloths or cosmetic pads (2, 10, 12). A removal opening (16) is provided in the manual access area located on the overlapping area (6) of the moist cloths or cosmetic pads (2, 10, 12).
