Abstract (en)

[origin: WO03038200A1] The invention concerns a machine tool equipped with a hydrostatic drive, a chassis wherein is housed a motor for driving the wheels and an upper structure mounted pivoting on the chassis and comprising a pump for supplying driving pressure. Between the chassis and the upper structure there is provided a rotating passage and in the chassis are housed one or several electronic components constituting a chassis electronic system for controlling and/or regulating elements of the chassis.
