Abstract (en)  
[origin: WO03027556A1] Bushing (10) for one or more cables (30) through a wall aperture (28), comprising not only a casing (12) which engages with the wall aperture but also filling means (22) to fill space in the casing. The filling means comprises a filling element (22) made of flexible material and provided with slitting (24) in order to accommodate and sealingly enclose said one or more cables (30) continuously through the casing (12), and the slitting comprises two or more slits (24). The invention also relates to a method for enclosing one or more cables through a wall aperture.
