Abstract (en)

[origin: EP1440897A1] A metallic crossbar terminal (1) for flexible handles (6), comprising an oblong sheet metal body defined by die-punching, having at least two lateral wings (4,5) foldable to crimp an end of the flexible handle laid over said oblong body, has the body in the form of an oblong tub. The wings extend from respective straight sides of the hem of the tub and are foldable to crimp onto the end of the flexible handle, pressed inside the concavity of said tub. <IMAGE>
